

CHI®

Touchscreen Clothing Iron

Powerful Steam
Precise Temperature

- **Introducing CHI® Irons:** The only irons developed using the same titanium-infused ceramic soleplate technology that powers the flagship CHI® G2 Flat Iron for hair. This unique soleplate provides the strength of stainless steel paired with the smooth glide of a nonstick iron. The CHI® Touchscreen Clothing Iron is scratch resistant, heats quickly and is comprised of 400 steam holes for superior performance.
- **From Hair to Wear™:** Designed with a sleek look and engineered for high performance, the CHI® line is the perfect balance of style and function. Achieve the same trusted results for your wardrobe as you expect for your hair. Flawlessly styled hair makes your whole appearance fresh and put together. Translate that feeling to your entire outfit for a polished look from head to toe.
- **First Touchscreen:** You don't clean your silk dress the same way you wash your cotton jeans. Now let your iron differentiate between materials, too. The first to feature a touchscreen control panel similar to smartphone technology, this new iron allows you to choose the material, temperature or power for a customized experience in your home laundry room. The touchscreen technology also provides peace of mind with step-by-step heating alerts and an auto shut-off capability.

With CHI® Flat Iron Technology
Titanium-Infused Ceramic Soleplate
Over 400 Steam Holes
for Superior Performance

Details

CHI® Touchscreen Clothing Iron (13103)

MSRP: \$149.99 Available: July 2018

- **Modern Style with Premium Materials:** The titanium infused ceramic soleplate is ultra-strong, abrasion resistant and retains heat longer with non-stick and non-static finishes resulting in smooth ironing every time.
- **Even More Features:** In addition to CHI® soleplate technology, the CHI® Touchscreen Clothing Iron is a high-powered 1800-watt iron. It comes equipped with a sleek handle with textured comfort grips, a unique easy to fill water access, an easy to reach adjustable steam lever, a 10-foot-long power cord and matte chrome accents.
